-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

3. Claim 4 is objected to because of the following informalities: In claim 4, lines 5-6, "the spare terminal" lacks antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagata et al., (Nagata), USPAT 6,342,931.**
6. Nagata discloses and shows in Fig. 9, a display device comprising a display panel having a spare wiring with which to repair imperfect connection in a signal wiring, wherein a terminal portion of the spare wiring is composed of first and second portions that are located at separate positions on a same surface of the display panel.
Accordingly, claims 1 and 2 are anticipated.

Art Unit: 2871

As to claim 4, the limitation of connecting the signal wiring to the spare wiring and connecting together the first and second portions of the terminal portion is considered as a product by process limitation. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985); see also MPEP 2113).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. **Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over**

Nagata as applied to claims 1, 2 and 4 above.

9. As to claim 3, positioning the terminal portion of the spare wiring at positions separate in a direction perpendicular to a display surface of the display panel is an obvious variation of positioning the terminal portion of the spare wiring at positions on a same surface of the display panel and thus would have been obvious.

Note: If applicant disagrees with examiner's assertion, applicant is reminded that a restriction requirement might be proper.

Art Unit: 2871

Conclusion

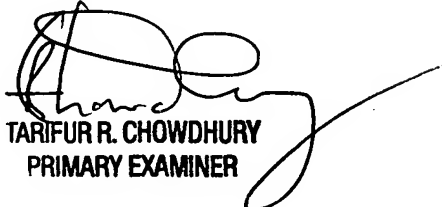

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
